This SDS is prepared in accord with the SWA document "Preparation of Safety Data Sheets for Hazardous Chemicals - Code of Practice" (July 2020).

# SAFETY DATA SHEET

## 1. Identification

Product name	: Finish Quantum Dishwashing Tablets Baking Soda
SDS no.	: D8408503
Formulation #	: FF3289950
Supplier	: AUSTRALIA RB (Hygiene Home) Australia Pty Ltd 680 George St , Sydney, NSW 2000 Tel: +61 (0)2 9857 2000
	NEW ZEALAND RB (Hygiene Home) New Zealand Limited 2 Fred Thomas Drive, Takapuna Auckland , New Zealand 0622 Tel: +64 9 484 1400
Poison Information contact:	: Australia - 13 11 26 New Zealand - 0800 764 766 or 0800 POISON
<u>Uses</u>	
Product use	: Machine dishwashing (powder, liquid, tablet) for consumer use
UPC Code / Sizes	: Doypack
	-
2. Hazard identifi	cation
2. Hazard identified Classification of the substance or mixture	Cation : SKIN CORROSION/IRRITATION - Category 2 SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2A
Classification of the	: SKIN CORROSION/IRRITATION - Category 2

## 3. Composition/information on ingredients

### Substance/mixture

: Mixture

Ingredient name	% (w/w)	CAS number
Carbonic acid, disodium salt	≥10 - ≤30	497-19-8
disodium carbonate, compound with hydrogen peroxide (2:3)	≥10 - <25	15630-89-4
Phosphonic acid, (1-hydroxyethylidene)bis-, tetrasodium salt	≥10 - ≤22	3794-83-0
Alcohols, C12-14, ethoxylated propoxylated	≤5	68439-51-0

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

The total concentration of ingredients in this product, reported or not in this section, is 100%.

Occupational exposure limits, if available, are listed in Section 8.

### 4. First-aid measures

Description of necessary first aid measures		
Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.	
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.	
Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.	
Ingestion	: Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.	

Most important symptoms/effects, acute and delayed

Date of issue	: 14/06/2024	Page: 2
Skin contact	: Adverse symptoms may include the following: irritation redness	
Inhalation	: No specific data.	
Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness	
<u>Over-exposure signs/sym</u>	iptoms	
Ingestion	: No known significant effects or critical hazards.	
Skin contact	: Causes skin irritation.	
Inhalation	: No known significant effects or critical hazards.	
Eye contact	: Causes serious eye irritation.	
Potential acute health effe	ects	

2/10

### 4. First-aid measures

Ingestion	- 1	No specific data.
Indication of immediate med	<u>dica</u>	l attention and special treatment needed, if necessary
Notes to physician	-	In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	1	No specific treatment.
Protection of first-aiders	-	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

5. Fire-fighting measures	
Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: No specific fire or explosion hazard.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides sulfur oxides phosphorus oxides metal oxide/oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	<ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.</li> </ul>
Hazchem code	: Not applicable

## 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures			
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.	
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".	
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).	
Methods and material for containment and cleaning up			
Small spill	:	Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.	

### 6. Accidental release measures

#### Large spill

: Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

#### See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

### 7. Handling and storage

#### Precautions for safe handling **Protective measures** : Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. : Eating, drinking and smoking should be prohibited in areas where this material is Advice on general handled, stored and processed. Workers should wash hands and face before occupational hygiene eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. **Conditions for safe storage**, : Store between the following temperatures: 5 to 30°C (41 to 86°F). Store in accordance with local regulations. Store in original container protected from direct including any sunlight in a dry, cool and well-ventilated area, away from incompatible materials incompatibilities (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

### 8. Exposure controls/personal protection

### Control parameters

#### Australia

Occupational exposure limits

#### No exposure standard allocated.

#### New Zealand

Occupational exposure limits

Ingredient name	Exposure limits
subtilisin	NZ HSWA 2015 - GRWM 2016 (New Zealand, 11/2020). [Subtilisins] Absorbed through skin. Inhalation sensitiser. WES-Ceiling: 0.00006 mg/m <sup>3</sup> , (measured as 100% pure crystalline enzyme)
Appropriate engineering controls	: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some

#### Individual protection measures

Date of issue         : 14/06/2024         Page: 4/1	Date of issue
--	---------------

cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### 8. Exposure controls/personal protection

•	• •
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	<ul> <li>Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
Other skin protection	<ul> <li>Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

### 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### **Appearance Physical state** : Solid. [multi-compartment capsule (Liquid. Powder. Gel)] Colour : White. Blue. Red. Odour : Not available. **Odour threshold** : Not available. pН : 10.2 [Conc. (% w/w): 10%] Melting point/freezing point : Not available. : Not available. **Boiling point, initial boiling** point, and boiling range **Flash point** : Not applicable. : Not available. **Evaporation rate** Flammability : Not available. Lower and upper explosion : Not applicable. limit/flammability limit : Not available. Vapour pressure **Relative vapour density** : Not applicable. Not available. **Relative density** ÷. Solubility(ies) ÷. Media **Result** cold water Easily soluble Easily soluble hot water **Miscible with water** : Yes. Date of issue : 14/06/2024 Page: 5/10

## 9. Physical and chemical properties

Partition coefficient: n- octanol/water	: Not applicable.
Auto-ignition temperature	: Not applicable.
Decomposition temperature	: Not available.
SADT	: >55°C (>131°F)
Heat of reaction	: <300 J/g
Viscosity	: Not applicable.
Particle characteristics	
Median particle size	: Not available.
10 Stability and u	reactivity

### Stability and reactivity

Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Incompatible materials	: No specific data.
Conditions to avoid	: Keep away from heat and direct sunlight. Protect from moisture. Do not expose to temperatures exceeding 50 °C/122 °F. Special shipping information: For long distance transport - Temperature control is required. at 30°C
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Chemical stability	: The product is stable.
Reactivity	: No specific test data related to reactivity available for this product or its ingredients.

## 11. Toxicological information

### Information on toxicological effects

**Acute toxicity** 

Product/ingredient name	Result	Species	Dose	Exposure
Carbonic acid, disodium salt	LD50 Dermal	Mouse -	2210 mg/kg	-
		Female		
	LD50 Oral	Rat	2800 mg/kg	-
disodium carbonate,	LD50 Dermal	Rabbit	2001 mg/kg	-
compound with hydrogen				
peroxide (2:3)				
,	LD50 Oral	Rat	1034 mg/kg	-
Phosphonic acid,	LD50 Dermal	Rabbit - Male,	2001 mg/kg	-
(1-hydroxyethylidene)bis-,		Female		
tetrasodium salt				
	LD50 Oral	Rat	940 mg/kg	-
Alcohols, C12-14,	LD50 Oral	Rat	2001 mg/kg	-
ethoxylated propoxylated				
Conclusion/Summary	Based on available data, the c	assification crite	ria are not met.	·

### Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation

Calculation method: Causes skin irritation.

# 11. Toxicological information

<b>-</b>	
Eyes	Calculation method: Causes serious eye irritation.
Respiratory	Based on available data, the classification criteria are not met.
Sensitisation Not available.	
Conclusion/Summary	
Skin	Based on available data, the classification criteria are not met.
Respiratory	Based on available data, the classification criteria are not met.
Germ Cell Mutagenicity	
Not available.	
Conclusion/Summary	Based on available data, the classification criteria are not met.
Carcinogenicity	
Not available.	
<b>Conclusion/Summary</b>	Based on available data, the classification criteria are not met.
Reproductive toxicity	
Not available.	
Conclusion/Summary	Based on available data, the classification criteria are not met.
Teratogenicity	
Not available.	
Conclusion/Summary	Based on available data, the classification criteria are not met.
Specific target organ toxicity	(single exposure)
Not available.	
Specific target organ toxicity	(repeated exposure)
Not available.	
Aspiration hazard	
Not available.	
Information on likely region	Net evaluable
Information on likely routes : of exposure	Not available.
Potential acute health effects	
	Causes serious eye irritation.
	No known significant effects or critical hazards.
	Causes skin irritation.
Ingestion :	No known significant effects or critical hazards.
-	
Symptoms related to the physic	cal, chemical and toxicological characteristics
Eye contact :	Adverse symptoms may include the following:
	pain or irritation
	watering redness
Inhalation :	No specific data.
	Adverse symptoms may include the following:
	irritation
	redness
Ingestion :	No specific data.
Delayed and immediate effects	as well as chronic effects from short and long-term exposure

### Short term exposure

## 11. Toxicological information

Potential immediate effects	:	Not available.			
Potential delayed effects	:	Not available.			
Potential immediate effects	:	Not available.			
Potential delayed effects	:	Not available.			
Potential chronic health effects					

Not available.

Conclusion/Summary		Based on available data, the classification criteria are not met.
General	:	No known significant effects or critical hazards.
Carcinogenicity	:	No known significant effects or critical hazards.
Germ Cell Mutagenicity	:	No known significant effects or critical hazards.
Teratogenicity	:	No known significant effects or critical hazards.
<b>Developmental effects</b>	:	No known significant effects or critical hazards.
Developmental effects	1	No known significant effects or critical hazards.

### Numerical measures of toxicity

#### Acute toxicity estimates

Route	ATE value
Oral	3952.94 mg/kg

## **12.** Ecological information

#### **Toxicity**

Product/ingredient name	Result	Species	Exposure
Carbonic acid, disodium salt disodium carbonate, compound with hydrogen peroxide (2:3)	Acute EC50 242000 µg/l Fresh water Acute LC50 176000 µg/l Fresh water Acute LC50 265000 µg/l Fresh water Acute LC50 300000 µg/l Fresh water Acute EC50 4.9 mg/l	Algae - Navicula seminulum Crustaceans - Amphipoda Daphnia - Daphnia magna Fish - Lepomis macrochirus Daphnia - Daphnia Pulex	96 hours 48 hours 48 hours 96 hours 48 hours

**Conclusion/Summary** 

Based on available data, the classification criteria are not met.

### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Product/ingredient name	LogPow	BCF	Potential
Phosphonic acid, (1-hydroxyethylidene)bis-, tetrasodium salt	-3	71	low

### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

## **12.** Ecological information

Other adverse effects

: No known significant effects or critical hazards.

### 13. Disposal considerations

```
Disposal methods
```

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### 14. Transport information

	ADG	ADR/RID	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.
UN proper shipping name	-	-	-	-
Transport hazard class(es)	-	-	-	-
Packing group	-	-	-	-
Environmental hazards	No.	No.	No.	No.

Hazchem code

: Not applicable

Special precautions for user : For long distance transport of bulk material or shrunk pallet take into consideration sections 7 and 10. Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available. to IMO instruments

### 15. Regulatory information

Standard for the Uniform Scheduling of Medicines and Poisons				
Not scheduled				
Australian Inventory of Industrial Chemicals (AIIC)	All components are listed or exempted.			
New Zealand Inventory of Chemicals (NZIoC)	All components are listed or exempted.			
HSNO Group Standard	Cleaning Products (Subsidiary Hazard)			
HSNO Approval Number	HSR002530			
Approved Handler Requirement	Not applicable.			
Tracking Requirement	Not applicable.
